Electrical Controls Engineer I

Quantum Solutions, Inc. is a leading, full-service integrator of control and automation systems, providing complete solutions for the total integration of manufacturing lines. We design and automate nearly all systems within a manufacturing facility and have over two decades of experience working with PLC and HMI systems. Our talented and dedicated electrical engineers use creativity and years of experience to design and program a control system that works, improving plant efficiency and safety while increasing production. Come join our exciting and growing team. We are currently looking for an Electrical Controls Engineer I for our Columbia, IL office.

Designs, programs, develops, installs, and supervises all aspects of electrical control systems, equipment, and machinery in a support Engineering role. Will be responsible for the onsite installation and technical support of PLC based hardware and software. Typical overnight travel ranging from 60-80 nights per year. Requires a bachelor's degree in electrical engineering and 0-3 years of experience in the field or in a related area. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment. Typically reports to a supervisor or manager.

We offer an excellent benefit and compensation package including 401(K)/match. Please email your resume to: careers@qsicontrols.com. Visit our website to learn more about who we are and what we do at www.qsicontrols.com. EOE.
